Message about the Draft Master Plan Documents

It is **very important** to note that the Draft Master Plan is an ongoing a work in progress....up until it is presented to the City Council on January 24th. There are still important meetings taking place with key agencies. Input from these meetings as well as comments received during the City Commission presentations may result in revisions to the present draft document before its presentation to the Pasadena City Council.

Please note that one key technical report is still not ready for public viewing; this is the Sediment Management Plan. Key comments from LA County Public Works were received at the same time this material was being sent out. As a result of these comments, additional meetings with the County will be occurring in tandem with the review of the draft master plan. Just as soon as these meetings occur and the revisions to the Sediment Management Plan are completed, the Sediment Management Plan will be available at the same locations mentioned above. It is intended to have this all occur well before the Draft Master Plan comes before the City Council on January 24th.

For further information, contact Rosa Laveaga, Project Manager at (626)744-4321.
